EDUCATION

University of Texas Rio Grande Valley

Bachelor of Science in Computer Science, Minor in Business Management

Edinburg, TX

Expected December 2026

EXPERIENCE

Software Engineering Intern

MBMT Law Firm

June 2024 – Present

Brownsville, TX (Remote)

- Partnered with firm staff to turn a months-long review bottleneck into a full-stack AI document-analysis agent on the Anthropic Claude API, projected to cut review to under an hour, triple case throughput, and add an estimated \$180K in revenue.
- Built a conversational chat interface that lets non-technical paralegals self-serve case data across 50+ active matters, replacing manual file searches and cutting case lookup time by an estimated 85%.

Teaching Assistant, AI-Agent Engineering

UTRGV Computer Science Department

August 2026 – Present

Edinburg, TX

- Chosen from a competitive pool to mentor 60+ students through weekly labs and office hours for UTRGV's AI-Agent Engineering course, contributing to a 100% course completion rate.
- Designed 10 autograded assignments and led 12 training sessions on AI-agent workflows (prompt design, evaluation, and testing) for technical and non-technical audiences, resulting in a 99% average assignment score.

Pilot Lead, Student Interest Group – AI Curriculum (SIG-AI)

UTRGV Computer Science Department

July 2026 – August 2026

Hybrid

- Built and piloted 3 AI-driven curriculum projects with faculty, introducing AI-assisted software development to 3,500 freshman and sophomore CS students.

Software Engineering Intern (Data & Reporting)

Region One Education Service Center

May 2025 – September 2025

Edinburg, TX

- Shipped production business-intelligence reports in SQL for staff across 58 campuses in 8 counties, tuning database performance to cut query time by 40%.
- Built a reusable SSRS index cutting documentation lookup 90%, saving 15 engineers an estimated 140 hours per report cycle.
- Evaluated 7 legacy applications for modernization with their owners, presenting findings and tradeoffs that aligned technical and non-technical teams.

PROJECTS

LLM Cost AutoPilot | Python, FastAPI, Docker, SQLite, Streamlit

- Built a reusable routing layer across the Anthropic, OpenAI, and Gemini APIs that scores request complexity and sends each query to the lowest-cost model meeting a quality threshold, cutting LLM API costs 30.6% vs. an all-GPT-4o baseline in a 750-request load test.
- Shipped a Dockerized FastAPI service, an asynchronous worker that verifies routing quality, and a Streamlit cost dashboard, hardened with non-root containers for production security.

AI Calendar Assistant | TypeScript, React, Node.js (Express), MySQL, Anthropic Claude API

- Architected a full-stack AI calendar app with natural-language event creation, backed by a 7-table MySQL schema and 43 RESTful API endpoints, so users schedule events conversationally instead of filling out forms.
- Integrated Google Calendar OAuth with real-time sync and shipped a companion Chrome Extension (Manifest V3) with JWT authentication, letting users create events from any webpage.

Customer Retention & Cohort Analysis | Python, pandas, matplotlib, seaborn

- Analyzed 540K+ e-commerce transactions with cohort retention models, identifying a 22.5% month-1 retention cliff and showing returning customers drove 88% of final-quarter revenue.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++

Full Stack: React, Next.js, Node.js (Express), FastAPI, Django, Streamlit, RESTful APIs, OAuth/JWT, Docker, Chrome Extensions

Generative AI: Anthropic Claude API, OpenAI API, Google Gemini API, prompt design, AI agents and workflows, Claude Code

Data & Tools: Git/GitHub, MySQL, SQLite, SQL (window functions, CTEs), pandas, SSRS/SSMS, Google Colab

LEADERSHIP & INVOLVEMENT

Founding President, ColorStack Chapter

National nonprofit advancing Black & Latinx students in computing

June 2025 – Present

Edinburg, TX

- Independently secured \$10K in sponsorships to send 9 students to AfroTech, connecting them with recruiters from 200+ companies and creating direct pathways to internships and full-time roles.
- Coordinated career programs for 500 students and built a mentorship program pairing underclassmen with industry alumni.

AWARDS & RELEVANT COURSEWORK

Awards: Dean's List (Fall 2025), Tapia Scholar 2025, Gilman Scholar, Last Mile Fund Alum, ColorStack Maestro Award

Coursework: Data Structures & Algorithms, Database Design & Implementation, Machine Learning
